**React Js Developer**  
Accrosoft | Lahore, Pakistan May 2021 - Present

I am working as a Front end engineer at Accrosoft. My major role here is to handle all work related to front end layer including UI designs with fully responsiveness, api's integration,SEO implementation, code optimization for better performance etc.

Projects

**CureBook** Aug 2022 - Feb 2023  
Freelancing  
<https://curebook.co/>  
Tools: React Js, Redux Toolkit, Chakra UI, Framer Motion

- Developed a responsive web application using ReactJS for a healthcare company.
- I have used chakra UI for styling and components to make fully featured web application and also used framer-motion for rich animation.
- And for api's calling and state management i have used redux and redux-toolkit for making asynchronous task.
- I have also implement third party api of google map for adding map in this project.
- This application is fully featured of adding a disease post, like post with comments and nested comments.
- User can also add a disease resource with google map and google map places.

**Imperial Locum** Apr 2022 - Present  
Accrosoft  
<https://imperiallocum.com/>  
Tools: React Js, Next Js, Tailwind CSS, Server Side Rendering, Static Side Generation

- Developed a fully featured SEO optimized web application for Doctors based in USA using React Js and Next Js.
- I have used (Server Side Rendering) for api calling which is really helpful in terms of performance and specially for SEO. And for static content i have used (Static Side Generation) which is really helpful for static conetent.
- I have used Tailwind CSS for styling to make fully featured responsive web application and also used framer-motion for professional and rich animation.
- I have also develope resuable components with the help of Tailwind CSS for maximum optimization.
- This application is really helpfull for doctors based in USA to find and apply for a job regarding to thier speciality.

**Jump Recruiter** Aug 2021 - Present  
Accrosoft  
<https://jumprecruiter.com>
